

Hawkshill Common Floral Survey 2013

by Eddie Turner

Introduction

Five new species need to be added to this year's list. These are: Sanicle, Rosey Garlic, Lesser Celandine, Scarlet Pimpernel and Great Plantain.

These plants apart, there appears to be no significant change to Hawksdown flora this year. Unfortunately, I was again unable to find violets on the West-facing Bank.

A number of unwanted invasive species have established themselves on the West-facing bank: Ash, Bramble, Hawthorn, Ivy, Nettle, Sycamore and Travellers' Joy. These need to be eradicated, as they could have a detrimental effect on the habitat we wish to conserve.
